

Tylö steam shower i110/c.

A home spa in the smallest of spaces.

In just 1.3 square metres of floor space Tylö has created a unique corner solution containing both a relaxing steam bath and a conventional shower. It's a revolution in home spa design, compact enough to fit into any standard bathroom. Steam bathing is a pleasure enjoyed in gentle heat. Humidity is 100%, but temperatures don't rise above 40–45°C, inviting you to linger a little longer and relax.

Tylö steam shower i110/c is built around the same unique profile system as the rest of the Impression series and includes a shared space for showers and steam baths in aluminium, glass and high-gloss acrylic (Art. 9607 4630).

TYLÖ[®]
for the senses

Thought through in every detail.

Excellent design and quality.

The attractive white bench in compression-moulded, high-pressure laminate is the epitome of good design – more than elegant enough to be used outside the shower as well. The design and finish of the cubicle makes it a pleasure to look at and is characterised by an intelligent concern for detail. The absence of nooks and crannies prevents the accumulation of any dirt and makes cleaning as easy as can be.

Tray as an extra option.

Tylö's steam shower i110/c can be equipped with a tray. The tray has a construction made of cast marble which is an extremely shape permanent material. The surface finish on the tray results in a good drainage. The tray has a built-in water seal

which gives the Tylö steam shower i110/c a total height of 2200 mm, i.e. 100 mm higher than without the tray (Art. 1800 0405).

Generous on the inside, but economical on the outside.

Our Swedish designers set themselves the task of combining practical everyday functions with an elegant setting where you can relax and pamper yourself in style. But Tylö steam shower i110/c is also remarkable for its ingenious compact design with the outside measures of 1125 x 1125 mm, height 2100 mm.
